Re: D.E.R. Image Summary v1

Dear Website Visitor,

This letter is important and a better responsible and accurate summary about Doug and business(es), especially while experiencing parts of identity theft among “Current Issues and Concerns” also. Identity theft is sometimes a valued topic and today it is early for any responsible summary including pending resolve -SEE Blog @edougAboutSNT.com. Although including available summaries and action as cooperative with responsible teams such as banking, helpful persons and businesses, current concerns include circular reference and result causing predictable conclusions and undesired vulnerability. All of these are occurring while other individuals and groups are in habit or advised assigning/relying on pre-descriptions, conclusions, or fault to Doug per *Issue* and per *Concern* –this clearly increases irresponsibility *and* slander *and* potential for harm and increased issues and concerns all around.

While this letter/web page material can be very difficult, specifically, improvement is not needed or required for Doug or business(es) although he has responsibly decided for canceling some parts of business development while vulnerable accordingly. "Need for improvement" is specifically a description error or unqualified description adversely leading from this responsible “Image Summary” about Doug and SNT. Please include this mention (need for improvement) and the following example in your current understanding or your discretionary mention while there are sometimes *unusual early* irresponsible or targeting conclusions or comment or slandering pre-descriptions that seem strong or indirectly effecting or possibly including messaging towards Doug. Sometimes unusual opinions and comments that are also *early* include popular credit or debt topics or misleading methods and participations in education about the same -SEE Web.

FAQ-What does *Second Nature Technology* sell? *Answer:* For your easier conversation and understanding SNT sells (public and private consumer technology only) computers, websites, and phone while also offering IT consulting services.

Example Occurring: Early comment for conclusion or USE of pre-descriptions, campaigns or advised participations about Doug’s correspondence, writing or speaking describing him, his work, or personal interest as “unclear” or in unusual high quantity or described as irresponsible ... SEE Web.

Reply version 1: First, adverse conclusions about Doug or business or personal interest from the example are at this time irresponsibly **predictable** and increasing vulnerability and concerns. Additionally, Doug is currently experiencing parts of “id theft” which also seem to be a valued contemporary topic and are, therefore, included in parts of popular effect and valued -from *any* perspective or interpretation at this time –SEE Web.

Thank you,

Doug Redstone, SNT 1-888-744-9204

Comment: For contact, please keep trying if you cannot get through to me.

INCL Doug Redstone is Power of Attorney (POA) for all and any aspects of each part of his personal and business activity and contacts requiring his consent for any other USE. There is also an obligated procedure for “office” disclosure and INFO gain while Doug is pre-expert for the contemporary IT industry. Here, any references to “v1” or “version 2” (often here for decisions and understanding while including requests and concerns or opinions of others) simply refers to next level of disclosure, a simple management technique normal during business development and partnership and research.
