Re: Looking for Work and a Supporting SNT Partner Aug 2011 By D.E.R r Aug 22 2011

Dear Addressed Recipient or Website Visitor,

Thank you for receiving my LinkedIn email and web INFO for mature asap direct contact with you or a referral while I am looking for work and a supporting IT or other *Second Nature Technology* partner or disclosure. My varied personal projects and interests have given me mature kind reason for correspondence to you among other Union College Alumni including my appropriate, design-ethical, and mentionable mixed Career and SNT Biz **Post Card** with a link to it, concerned for recent error requiring your feedback. Mature personal and business planning and projects are contemporarily flexible to your referral, hire, or partnership condition or preference.

Currently and in contemporary office achievement while most of us are busy, I own a solid and valued IT (and electronics) company despite assessments we are used to such as income, revenue, or debt all valued for any result and outcome at this juncture in Aug 2011. Clearly and eventually, you will find I am without irresponsible management or faulted relationship earlier and currently able to maintain career and SNT biz value awaiting your reply and consideration. Also, my current priorities in whole company ownership clearly identifies early influence, often well intended but partial, including misdirection or unqualified exposure, disclosure that is better for non-encouragement and private correspondence mutually looking forward. In my designed "Help and Interest" format and Post Card, I have both a non-conflicting privacy concern and a need for your timely receipt and consideration for projects, work, or referrals (different than sales, here as "rally and rescue"). Specifically, your consideration and my pending receipt includes a supporting partner contact, an advertising partner contact or timely disclosure of same with myself, Doug Redstone as only advised POA for all personal and business activity and inferred.

In mid August and September 2011, your communicated receipt, your reading-review of Post Card, content and web content, your personal consideration and your effort in forwarding this letter and Post Card is greatly appreciated and needed at this time while I am vulnerable and in pending fulfillment of "Help and Interest." Thank you for your review, reading and inclusion of the additional pages here totaling three (3) including my comment below.

Looking Forward,
Doug Redstone

Prsnl: 201-953-6223

Work: 1-888-744-9204 (SNT)

Comment: Sometimes, non-reply or delay gives circular result to me and sometimes encourages other's claim of responsible delay, immature or even dangerous messaging toward me about delay topics - *I understand your discretion and non-reply* but this is also sometimes a repeating result or repeated claim of responsible, but partial test method about my receipt of non-reply while many people are busy, a circular reason and cause multiplying shared economic concerns and stress. Your accurate understanding is appreciated and this paragraph is continued on the LAST PAGE.

Re: Doug's Image Summary r August 2011
Aug 21st 2011

Dear Website Visitor,

Thank you for receiving this obligated or concerned "Image Summary v1" letter and concern example August 2011. While there is potential for unusual parts to effected correspondence, please include this important letter at this time (not usually) with my account profile for your accurate understanding of our relationship and my consumer technology business *Second Nature Technology* (SNT). Your reference to this letter and example is immediately and eventually a better responsible atmosphere for our relationship and my reliability.

Importantly, please include earlier corresponded "Image Summary" from March 2011 and Archive @ www.DougsImageSummary.Yolasite.com.

Currently, there are varied undesirable multi-effects to some of my personal and business activity and sometimes I have a tech alert current in my "Image Summary Immediate Status" at the same website. Therefore, please let me know if there is anything unusual to our personal, business, or public and private responsible relationship -transactions, INFO exchange, contact, etc. Please also note I have corresponded there is no (none) consent in use for training at this time because best responsible format is agreed project and direct contact accordingly also match my appropriate, design-ethical and mentionable Career and SNT Biz Post while non-encouraging of using issue or concerns for improvement or relationship -here part of crisis management. While there is mutual concern and repeating unusual issues, this type of use is better for contact, meeting and agreed project format usual and expected.

Most importantly, all (Referencing "Topics" @ my "image Summary") of these issues and concerns mentioned here are not part of expected or usual office, meeting, travel, and contact and best responsible indication of relationship is your accurate understanding and application of description here. There is also a positive description and summary, valued and shortly summarized as your biz and project expectations, my everyday effort in remedial task to serious project, my flexible availability for partnership and advertising partnership fulfillment and/or disclosure and my personal career and SNT business without loss of value at this time.

Thank you,
Doug Redstone, SNT, 1-888-744-9204 (also Doug is Power or Attorney for personal and business priorities)

Re: Mature Industry Relevant and IT including SNT by D.E.R. Aug 2011 Pg 2 (LAST PAGE)
Aug 19th 2011

Comment: Sometimes, non-reply or delay gives circular result to me and sometimes encourages other's claim of responsible delay, immature or even dangerous messaging toward me about delay topics, > not usually but during current vulnerability while also irresponsibly blaming me and my reputation for any status of pending or incomplete results and expectation -unqualified or benefiting exposure, disclosure. Here, I am describing individuals, groups and procedures in use of irresponsible, out-of context, arranging, or interpretive habit or practice from *your* said decided non-reply with reason such as quantity of content in this paragraph or pages *-I understand your discretion and non-reply* but this is also sometimes a repeating result or repeated claim of responsible, but partial test method about my receipt of non-reply while many people are busy, a circular reason and cause multiplying shared economic concerns and stress. Your accurate understanding is appreciated.

During current defined business crisis and personal effects (manageable but in what seems to be a non-consent use, exposure, or disclosure of my spending and activity), harmfully targeting individuals and groups unusually reply or include switching mis-INFO mentions or descriptions such as "non-expectation" ("we don't expect you to be successful ...") adding additional damage to my day, project, personal or business login, actual person or business while today I remain in help need with pre-project and pre-contract atmosphere repeating. Clearly this is a non-supportive environment to say the least relying on priority which does not include my comment or description or is even sometimes in claim of agreement, help or concern during my defined business crisis and personal effected corresponded. Also effecting with an already mature human resource experience and priority for other's interpretations and concerns, I am deciding for a revised SNT home office and with current and pending research for personal real-estate, rent and personal projects and planning usual. Sometimes these types of toxic relationships, encouraged, benefiting another or new to me, includes conflicting localization and gaming atmosphere inappropriate at this valued juncture. Accordingly, all mentions and considerations by me and sometimes including personal, business, private and public relationships are normally and usually flexible with strong structure use also -flexible according to your preference, advisement, need, etc. Thank you.
