Re: Mature Industry Relevant and IT including SNT by D.E.R. Aug 2011

Dear Addressed Recipient or Website Visitor,

My varied personal projects and interest have given me kind reason for correspondence to you, Oprah Winfrey, including my appropriate, design-ethical, and mentionable mixed Career and SNT Biz Post Card. Currently, I have both a non-conflicting privacy concern and also a need for your timely receipt and consideration for projects, work, or referrals including a supporting partner, advertising partner or disclosure of same with myself, Doug Redstone as only advised POA for all personal and business activity and inferred.

In mid August and September 2011, your communicated receipt, your reading-review of the mature personal letter on the next page, your personal consideration and your effort in forwarding this letter and Post Card is greatly appreciated and needed at this time while I am vulnerable and in pending fulfillment of "Help and Interest." Thank you for your review, reading and inclusion of the additional pages here totaling five (5) including my comment below.

Looking Forward,
Doug Redstone

Prsnl: 201-953-6223

Work: 1-888-744-9204 (SNT)

Comment: Sometimes, non-reply or delay gives circular result to me and sometimes encourages other's claim of responsible delay, immature or dangerous messaging toward me about delay topics while also blaming me and my reputation for any status of pending or incomplete results and expectation. Here, I am describing individuals, groups and procedures in use of irresponsible out-of context, arranging, or interpretive habit or practice from *your* said decided non-reply with reason such as quantity of content in this paragraph or pages -I understand your discretion and non-reply but this is also sometimes a repeating result or repeated test of my receipt of non-reply while many people are busy. Your accurate understanding is appreciated and this paragraph is continued on the LAST PAGE.

Re: Mature Industry Relevant and IT including SNT by DER Aug 2011 LETTER
Aug 19th 2011

Dear Addressed Recipient or Website Visitor,

Earlier I have corresponded nothing, no inappropriate or controversial material to you and your staff as I began my writing as an inventor, published at the United States Patent and Trademark Office. Specifically, I sent a letter complimenting your social and community achievement with an exaggerated appreciation of a phonetical spelling of your name, giving it a dominating mention and for genuine, appropriate laughs to lighten up an office day or meeting -that was my vision in sending the letter or email anyway.

However, my recent mature understanding of privacy, public and private gaps and some popular concerns includes some regret or at least caution while there are potentially individuals, groups, or even procedures who are well intended but use something like my correspondence and creative writing, changing it to an adverse mention or silent damaging campaign in their own short day or achievement. Additionally for relationship and business disclosure, consideration or potential (our mature industry and personal “desks” and “professional” responsibility), an increase in relevance, experience and my understanding of popular concern and individual preference is current without misplaced competitive spirit, error, or compromise of ethics and everyday team atmosphere understanding. During your consideration, conclusions, and decisions forward, please include my ability and lifetime practice to stay away from the legal and business jargon or to include it with my valued understanding of maturing experience and methods also (again, please SEE edougAboutSNT.com resume-style and the Post Card sent to Oprah@Oprah.com saving you and staff effort and time).

Therefore, today in mid August 2011 I am still with “Help and Interest” disclosure or fulfillment need, adding a couple of detail concerns such as safety, privacy, and expense for any consideration and receipt. These are specifically and maturely included in my written “Image Summary” available @ DougImageSummary.Yolasite.com.

Best indication of relationship is importantly often or always ***not*** glance assessment when adverse or when unusually missing the comments and descriptions here. Instead, your accurate understanding and application of some or all of my correspondence to you is responsibly best indication of valued earlier, current and future relationship and contact.

Re: Mature Industry Relevant and IT including SNT by DER Aug 2011 LETTER Pg2
Aug 19th 2011

While I am founder of *Second Nature Technology* and inventor of the *Network Radio*, a new radio (for “consideration” I describe it in case of kids, controversy, conflict or mis-USE of the communications and relevant industries) and you, Oprah Winfrey, are included and owner of a network and varied syndications, *Own*, our advisement, mutual concerns, and regulated market demand and replies can be sure for inclusion of anti-trust law, fair consideration, and trends responsibly and ethically of course. Specifically, I mention this in flexible and assertive business understanding which both seem to be expected or less important among different responsibilities and crowds. Appropriate individual and market variation application is something I have ethically, faithfully prioritized or sometimes included non-concern with as a consumer technology business owner and founder of SNT.

FAQ-What is the perspective of our relationship, disclosure or potential relationship?

Answer: Simply, I would be “visiting consult”, “consultant” or “partner.”

Comment: Historically, IBM is leading in some of those terminologies and such as “project manager” or “assistant” or other position description and title also includes less IT priority minded people, industries and technology.

Sincerely,
Doug Redstone

Prsnl: 201-953-6223

Work: 1-888-744-9204 (SNT)

P.S. Please note while controlling contact and exposure I have experienced some difficult email, phone, and mail contact at my current location, away from my resident state CA and importantly including “Image Summary Archive Ping and FAQs.” Sometimes this can be important as consult or such as in current visiting, frequent, or other description of my SNT Tri-State, NYC market consideration and business development, including an unexpected delay at my relatives in Woodcliff Lake, NJ with some unraveled id theft. These mentions include usual and expected contact and correspondence to Local, Regional, State and Federal Departments of Commerce including regulated and accepted Web and IT industry contacts and offices.

Re: Doug's Image Summary r August 2011
Aug 19th 2011

Dear Website Visitor,

Thank you for receiving this obligated or concerned "Image Summary v1" letter and concern example August 2011. While there is potential for unusual parts to effected correspondence, please include this important letter at this time (not usually) with my account profile for your accurate understanding of our relationship and my consumer technology business *Second Nature Technology* (SNT). Your reference to this letter and example is immediately and eventually a better responsible atmosphere for our relationship and my reliability.

Importantly, please include earlier corresponded "Image Summary" from March 2011 and Archive @ www.DougsImageSummary.Yolasite.com.

Currently, there are varied undesirable multi-effects to some of my personal and business activity and sometimes I have a tech alert current in my "Image Summary Immediate Status" at the same website. Therefore, please let me know if there is anything unusual to our personal, business, or public and private responsible relationship -transactions, INFO exchange, contact, etc. Please also note I have corresponded there is no (none) consent in use for training at this time because best responsible format is agreed project and direct contact accordingly also match my appropriate, design-ethical and mentionable Career and SNT Biz Post while non-encouraging of using issue or concerns for improvement or relationship -here part of crisis management. While there is mutual concern and repeating unusual issues, this type of use is better for contact, meeting and agreed project format usual and expected.

Most importantly, all (Referencing "Topics" @ my "image Summary") of these issues and concerns mentioned here are not part of expected or usual office, meeting, travel, and contact and best responsible indication of relationship is your accurate understanding and application of description here. There is also a positive description and summary, valued and shortly summarized as your biz and project expectations, my everyday effort in remedial task to serious project, my flexible availability for partnership and advertising partnership fulfillment and/or disclosure and my personal career and SNT business without loss of value at this time.

Thank you,
Doug Redstone, SNT, 1-888-744-9204 (also Doug is Power or Attorney for personal and business priorities)

Comment: Sometimes, non-reply or delay gives circular result to me and sometimes encourages other's claim of responsible delay, immature or dangerous messaging toward me about delay topics while also blaming me and my reputation for any status of pending or incomplete results and expectation. Here, I am describing individuals, groups and procedures in use of irresponsible out-of context, arranging, or interpretive habit or practice from *your* said decided non-reply with reason such as quantity of content in this paragraph or pages -I understand your discretion and non-reply but this is also sometimes a repeating result or repeated test of my receipt of non-reply while many people are busy. Your accurate understanding is appreciated.

During current defined business crisis and personal effects (manageable but in what seems to be a non-consent use, exposure, or disclosure of my spending and activity), harmfully targeting individuals and groups unusually reply or include switching mis-INFO mentions or descriptions such as "non-expectation" ("we don't expect you to be successful ...") adding additional damage to my day, project, personal or business login, actual person or business while today I remain in help need with pre-project and pre-contract atmosphere repeating. Clearly this is a non-supportive environment to say the least relying on priority which does not include my comment or description or is even sometimes in claim of agreement, help or concern during my defined business crisis and personal effected corresponded. Also effecting with an already mature human resource experience and priority for other's interpretations and concerns, I am deciding for a revised SNT home office and with current and pending research for personal real-estate, rent and personal projects and planning usual. Sometimes these types of toxic relationships, encouraged, benefiting another or new to me, includes conflicting localization and gaming atmosphere inappropriate at this valued juncture. Accordingly, all mentions and considerations by me and sometimes including personal, business, private and public relationships are normally and usually flexible with strong structure use also -flexible according to your preference, advisement, need, etc. Thank you.
